

MaxiCut[®]

ULTRA[™]

proRange[®]

MaxiCut[®] Ultra[™] is our latest cut offering for dry environments that integrates the core values of MaxiCut[®] into a thinner, more comfortable and durable package.

Certified to be washed.
CLEAN, FRESH AND COST EFFECTIVE

TECHNOLOGIES INSIDE

CUTtech[®]

Comfortable cut protection

Innovative fibres - CUTtech[®] combines and blends high performance yarns and fibres to impart different levels of cut protection with the driving philosophy to deliver high levels of comfort and wearer satisfaction.

Reinforcement - between the thumb and forefinger, improves cut resistance and extends glove life in an inherently weak area.

AIRtech[®]

360° Breathable

360° breathability - Our patented micro-foam coating channels moisture and heat away from your skin to maintain an optimal hand temperature so you can work productively.

For a greater cooling effect look to use our AD-APT[®] Technology which works in conjunction with AIRtech[®].

DURAtch[®]

Longer use saves you money and protects the environment

Gloves equipped with DURAtch[®] are built to last longer. Thanks to our patented DURAtch[®] technology, we ensure above-average abrasion resistance. But that's not all. When combined with our preconditioned liners, the coating can be washed several times without degrading. This significantly increases the glove's service life, not only saving you money but also helping to conserve resources.

ERGotech[®]

Reduces hand fatigue

Form, fit and feel - mimics the "hand at rest", reducing hand fatigue and increasing comfort.

Latest knitting technology - utilized to produce smooth and rounded fingertips, improving fingertip sensitivity.

Consistent liner penetration - from the nitrile, leaving only the soft liner resting against the skin.

GRIPtech[®]

For a secure grip

Optimized grip - delivered through our micro-cup finish, allows for a controlled grip. GRIPtech[®] decreases hand fatigue and increases

CLEANLINESS GUARANTEED

We use our HandCare[®] Program for every single ATG[®] product. Not only do we make certain that all the elements used in our manufacturing process are safe for our employees, we also wash all the gloves after the production process as a further step in ensuring cleanliness. During this laundering process, we prefer the use of water that is rain-harvested, treated and continually recycled from our own water treatment facilities.

This enables us to guarantee our gloves to be "Fresh out of the pack" which is certified by Oeko-Tex[®] according to Standard 100. We do not use any SVHC during our manufacturing process.

And if that wasn't enough our gloves are also dermatologically accredited by the Skin Health Alliance. The Skin Health Alliance seal gives, for the first time in the safety industry, professional glove users the confidence that ATG[®]'s full range of gloves are "dermatologically safe" and the science and research behind them is robust.

More information about HandCare[®] by ATG[®] is available at www.atg-glovesolutions.com.

TECHNOLOGIES INSIDE

Comfortable cut protection

Innovative fibres - CUTtech[®] combines and blends high performance yarns and fibres to impart different levels of cut protection with the driving philosophy to deliver high levels of comfort and wearer satisfaction.

Reinforcement - between the thumb and forefinger, improves cut resistance and extends glove life in an inherently weak area.

For protection against oils and hazardous chemicals

Liquid repellence - through use of two technology platforms, layered on top of one another, we have ensured increased resistance to oils via our LIQUitech[®] technology platform.

Longer use saves you money and protects the environment

Gloves equipped with DURAttech[®] are built to last longer. Thanks to our patented DURAttech[®] technology, we ensure above-average abrasion resistance. But that's not all. When combined with our preconditioned liners, the coating can be washed several times without degrading. This significantly increases the glove's service life, not only saving you money but also helping to conserve resources.

Reduces hand fatigue

Form, fit and feel - mimics the "hand at rest", reducing hand fatigue and increasing comfort.

Latest knitting technology - utilised to produce smooth and rounded fingertips, improving fingertip sensitivity.

Consistent liner penetration - from the nitrile, leaving only the soft liner resting against the skin.

For a secure grip

Optimized grip - delivered through our micro-cup finish, allows for a controlled grip. GRIPtech[®] decreases hand fatigue and increases safety.

CLEANLINESS GUARANTEED

ALSO AVAILABLE IN THE MAXICUT® RANGE

MaxiCut® Ultra™

MaxiCut® Ultra™ is our latest cut offering for **dry environments** that integrates the core values of MaxiCut® into a thinner, more comfortable and durable package.

MaxiCut® Ultra™ with AD-APT®

Now available with the new and improved AD-APT® Cooling Technology. MaxiCut® Ultra™ is our latest cut offering for **dry environments** that integrates the core values of MaxiCut® into a thinner, more comfortable and durable package.

MaxiCut® Ultra DT™

MaxiCut® Ultra™ is our latest cut offering for **dry environments** that integrates the core values of MaxiCut® into a thinner, more comfortable and durable package.

MaxiCut® Ultra DT™ with AD-APT®

Now available with the new and improved AD-APT® Cooling Technology. MaxiCut® Ultra™ is our latest cut offering for **dry environments** that integrates the core values of MaxiCut® into a thinner, more comfortable and durable package.

MaxiCut® Ultra™ (uncoated)

MaxiCut® Ultra™ is our latest cut offering for **dry environments** that integrates the core values of MaxiCut® into a thinner, more comfortable and durable package.

MaxiCut® Ultra™ (Sleeves)

MaxiCut® Ultra™ Sleeves are the perfect companion for one of our cut gloves to offer increased protection for your arm.

MaxiCut®

MaxiCut® combines cut protection with comfort, flexibility and dexterity for **dry environments**.

Where to use:

MAXICUT® OIL™ IS DESIGNED FOR USE IN OILY OR WET ENVIRONMENTS WITH AN INCREASED RISK OF CUT.

MaxiCut®

proRange®

MaxiCut® combines cut protection with comfort, flexibility and dexterity for dry environments.

Certified to be washed.
CLEAN, FRESH AND COST EFFECTIVE

TECHNOLOGIES INSIDE

CUTtech®

Comfortable cut protection

Innovative fibres - CUTtech® combines and blends high performance yarns and fibres to impart different levels of cut protection with the driving philosophy to deliver high levels of comfort and wearer satisfaction.

Reinforcement - between the thumb and forefinger, improves cut resistance and extends glove life in an inherently weak area.

AIRtech®

360° Breathable

360° breathability - Our patented micro-foam coating channels moisture and heat away from your skin to maintain an optimal hand temperature so you can work productively.

For a greater cooling effect look to use our AD-APT® Technology which works in conjunction with AIRtech®.

ERGotech®

Reduces hand fatigue

Form, fit and feel - mimics the "hand at rest", reducing hand fatigue and increasing comfort.

Latest knitting technology - utilised to produce smooth and rounded fingertips, improving fingertip sensitivity.

Consistent liner penetration - from the nitrile, leaving only the soft liner resting against the skin.

GRIPtech®

For a secure grip

Optimised grip - delivered through our micro-cup finish, allows for a controlled grip. GRIPtech® decreases hand fatigue and increases safety.

CLEANLINESS GUARANTEED

We use our HandCare® Program for every single ATG® product. Not only do we make certain that all the elements used in our manufacturing process are safe for our employees, we also wash all the gloves after the production process as a further step in ensuring cleanliness. During this laundering process, we prefer the use of water that is rain-harvested, treated and continually recycled from our own water treatment facilities.

This enables us to guarantee our gloves to be "Fresh out of the pack" which is certified by Oeko-Tex® according to Standard 100. We do not use any SVHC during our manufacturing process.

And if that wasn't enough our gloves are also dermatologically accredited by the Skin Health Alliance. The Skin Health Alliance seal gives, for the first time in the safety industry, professional glove users the confidence that ATG®'s full range of gloves are "dermatologically safe" and the science and research behind them is robust.

More information about HandCare® by ATG® is available at www.atg-glovesolutions.com.
